DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see the amendment, filed 13 May 2006, with respect to the claims have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

Allowable Subject Matter

2. Claims 2, 3, 5-20, 22, 23 and 25-29 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest an image pickup apparatus comprising a string of pixels, a CCD register adjacent to the CCD pixels, two or more wiring layers formed in a lamellar shape and a contact having a length longer than the width of one pixel along an electric charge transfer direction of the CCD register between an electrode and a wiring layer, and between two wiring layers vertically adjacent to each other via an insulating layer as claimed in claims 2, 3, 5-20, 22, 23 and 25-29. While it is known in the art to provide a similar CCD structure (see for example Figure 6 of Nakashiba, US 5,442,396) and to provide light shielding structures which have a longest length in a CCD register transfer direction (Wakayama et al., US 5,736,756) the use of contacts having a longest length in a CCD register transfer direction which is longer than the width of a pixel to form a light shielding structure between an electrode and a wiring layer or between two wiring layers is neither taught nor suggested.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
